

Providing for the Health, Welfare, and Safety of our Children

Our Mission

The mission of the Texas Pediatric Society Foundation (TPSF) is to enhance the well-being of Texas children by supporting efforts to help improve their health, safety, and education and to make a positive impact on their lives and futures.

Circle of Giving

About the TPS Foundation

Established in 2001, the TPSF is primarily led and supported by pediatricians. We support the initiatives that are important to pediatricians and their patients.

We've joined the fight against childhood obesity, promoted literacy, battled child abuse, and helped keep kids safe in the car, on the playground, at school, and at home.

We've awarded funds to projects and programs across the State to make Texas a better place for children!

2019 Featured TPSF Grantee

Camp Dragonfly

Created for the benefit of children & adolescents who have suffered the loss of a significant person in their life through death, *Camp Dragonfly* helps them find their voice again, confront their loss, and know that they can move forward as they begin to heal. The camp is offered at low or no cost to the families depending on income, and the grant from TPSF helps make it possible for more children to attend camp each year.

2019 Featured TPSF Grantee

Drowning Prevention

Drowning is the number one cause of unintentional injury related death for children under 5 and a leading cause for ages 1-14 death among Texas children. Contrary to what most people believe, drowning is a quick and silent killer, and children ages one to four years old have the highest drowning mortality rates. The Texas Drowning Prevention Alliance and Colin's Hope are two non-profit organizations that hope to reduce those rates.

These organizations joined forces to provide educational materials and resources to families, pediatricians, and communities to raise awareness on how to prevent drowning and save lives.

The TPSF grant helps these organizations provide water safety educational lessons, swim lessons, and resources to children and their families, while also offering additional drowning prevention resources to pediatricians and medical professionals.

The program's curriculum raises children's water safety knowledge, ultimately keeping them safe around water, and the addition of swim lessons increases their swimming and survival skills.

Circle of Giving

Why Give?

We've been your ally in the initiatives we supported over the last 15 years because your voice is our voice. We rely on the pediatricians of Texas to identify the emerging needs and issues important to children in Texas. Giving to TPSF is not only a contribution to support children's health and safety, but also a contribution to yourself, your colleagues, and your friends who are doing great work that will make a difference.

Your Foundation. Your legacy. Give today.

I Give!

Read more about our giving levels below to find the one that is right for you. Fill out a donor card or go to txpeds.org/tps-foundation and give today.
